👤 PROFILE

Computer Science undergraduate with hands-on experience in AWS cloud infrastructure, CI/CD automation, and full-stack development (MERN stack, Java). Seeking a DevOps Engineer or System Engineer role to apply practical experience in cloud infrastructure, deployment automation, and application development.

🎓 EDUCATION

Faculty of Computing, University of Bedfordshire <i>BSc . Computer Science(Undergraduate)</i>	<i>2024 – Present</i>
Richmond College, Galle <i>Successfully Completed OLs</i> ALs (Biological Science Stream): Physics - C, Chemistry - C, Biology - C	<i>2015 – 2024</i>

🧰 PROJECTS

AWS Cloud Infrastructure, CI/CD Pipeline	<i>2026 - ongoing</i>
---	-----------------------

- Designed and deployed a secure, multi-tier VPC with public/private subnets, custom route tables, and Internet/NAT gateways; configured security groups and network ACLs to enforce least-privilege access for EC2 instances across both tiers.
- Built an end-to-end CI/CD pipeline using CodeCommit, CodeBuild, and CodePipeline, implementing a Blue/Green deployment strategy via CodeDeploy for zero-downtime releases. Provisioned infrastructure as code with Terraform, deploying a load-balanced application across multiple availability zones; used CloudFormation for repeatable stack templates.
- Containerized an application and deployed it through ECR and ECS, with CloudWatch alarms and EventBridge rules configured for monitoring and event-driven automation.
- **Technologies:** AWS (EC2, VPC, IAM, S3, Route 53, CloudFormation, CodeCommit, CodeBuild, CodePipeline, CodeDeploy, ECR, ECS, CloudWatch, EventBridge, Secrets Manager), Terraform, Docker, Bash

Linux Infrastructure & Web Server Lab	<i>2025</i>
--	-------------

- Deployed and configured an Ubuntu Server instance in Oracle VirtualBox to simulate a small business server environment. Installed and configured the Apache Web Server to host a sample company intranet site, including basic virtual host setup.
- Configured SSH for secure remote server administration and day-to-day system management. Set up and managed the UFW firewall to control inbound and outbound traffic and restrict access to essential services. Wrote a Bash script to automate scheduled backups of web server files and configuration data.
- Configured basic system monitoring to track server resource usage (CPU, memory, disk) and service status.
- **Technologies:** Oracle VirtualBox, Ubuntu Server, Apache, SSH, UFW Firewall, Bash Scripting, OpenSSL, Linux User & Permission Management

Pre-school Management System - [GitHub Repo](#)

2026

- A software solution designed to streamline administrative and academic operations in early childhood education centers, including student records, attendance, fee management, and parent-teacher communication.
- **Technologies:** React, Node.js, Express.js, MongoDB
- **Contribution:** Full-stack development

Logistic Transport Management System - [GitHub Repo](#)

2026

- A Java-based desktop application for managing transportation logistics, built with OOP principles.
- **Technologies:** Maven, Swing/AWT GUI, JDBC, OOP, API
- **Contribution:** GUI Interface, Shipment Scheduling

AussiePath Customer Portal - [GitHub Repo](#)

2026

- Developed a responsive customer portal for an Australian migration consultancy, enabling users to register, manage profiles, submit inquiries, and track their application progress through a modern and user-friendly interface.
- **Technologies:** React.js, JavaScript, HTML, CSS
- **Contribution:** Developed the frontend, implemented responsive UI components, integrated backend APIs, and collaborated with the backend team.

⚙️ TECHNICAL SKILLS

- **Cloud (AWS):** EC2, VPC, IAM, S3, Route 53, ECS, ECR, CloudWatch, EventBridge, Secrets Manager, Elastic Load Balancing
- **DevOps & CI/CD:** CodeCommit, CodeBuild, CodePipeline, CodeDeploy, Blue/Green Deployment
- **Programming Languages:** Java, JavaScript, Python, C, SQL, PHP, Bash
- **Frameworks:** React, Express, Bootstrap
- **Databases:** MySQL, MongoDB, Firebase
- **OS:** Ubuntu Linux, Windows Server
- **Linux Administration:** SSH, user and permission management, UFW firewall, Bash scripting, system monitoring
- **Infrastructure & Security:** Apache Web Server, IIS Web Server SSL, SSL Certificates, SSL VPN
- **System Administration:** SSH, Linux users, Linux file permissions, UFW firewall
- **Networking:** DNS, DHCP, TCP/IP, Public & Private IP addressing, subnets, NAT and Internet gateways, route tables
- **Virtualization:** Oracle VirtualBox

★ PERSONAL SKILLS

- Problem Solving • Teamwork • Time Management • Leadership • Fast Learner • Critical Thinking
- Multicultural Adaptability • Adaptability • Work Ethic
